

Color Correctors

There is no mistake we can not help you correct!

You can use our Mixing Solution to dilute our color correctors as needed for a better color coverage, to match a skin tone or to match the existing brow or lip color.

If the lip has a natural brown or purple tone we advise you to use a combination of our color correctors Lollipop and Cream to neutralize this first.

Grey Away can be used to neutralize blue, green or grey on existing eyebrows.

Cream is a skin tone or flesh colored pigment to camouflage any minor mistake or correction.

QUANTUM

PMU COLORS

Green can be added to any warm brown mixture. It can also be used to neutralize existing pink, orange or purple eyebrows.

Swift is an orange based red and can be used to neutralize brown or purple lip tones.

Butterscotch is used to counteract purple and violet tones

Lollipop is used to neutralize any natural dark lip before a lip blush procedure.
